RESCUMED™ MANUAL RESUSCITATOR

- Single patient use resuscitation/ventilation bag available in five sizes/volumes
- Available with or without integrated pressure manometer
- Integrated color-coded pressure manometer effectively promotes proper pressure delivery (<20 cm H₂O); the tri-color fields alert to the risk level of delivered pressure
- Accurate pressure delivery helps reduce gastric insufflation, thus preventing vomiting, aspiration and resulting pneumonia
- Face mask proportionately sized to resuscitation bag size
- Select from a variety of components to assemble a custom resuscitation bag to meet your unique patient needs (see opposite side)

Green - Target pressure level <20 cm H₂O
Yellow - Potentially dangerous pressure level
Red - Dangerous pressure level

POP-OFF VALVES

40 cm H₂O & 25 cm H₂O
Allows clinician to use an appropriate pop-off level

FILTERS

A bacterial/viral filter provides effective protection for the healthcare provider during expiration

CO₂ INDICATOR

Choose from: STAT-Check II™, MaxCap™, or FloCap® for effective assessment of CO₂ exchange
